

Warm-up: step 1

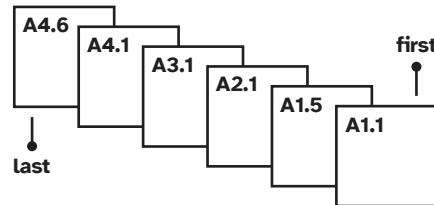

[fill in your individual goal cards then fill in a collective group card]

[record what changed since the last session]

Activities: step 2

[stack your chosen activity cards for this session in the following order:

Remember!

Check-in on your team

Is everyone on board? Is someone feeling a bit lost?

Balance everyone's time

Are you taking too long on something? Does everyone have enough time to speak?

Wrap-up: step 3

[fill in your individual key takeaway cards and your change cards]

[set a date for your next session with the toolkit]

How to Use

Recommended:

3-7 team members

at least 1h per session

What is this

Toolkit to foster exploration of the phases of **care ethics** in **community** projects.

Our goal

Create space for thoughtful **dialogue**, personal **reflection**, and collective **action**.

How it works

Select **activities** and fill in the corresponding **worksheets** as a **group** to promote discussion.

① Choose and print the activities for the session

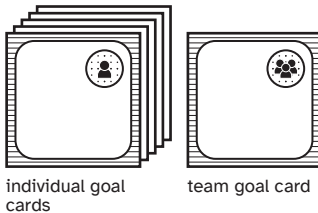

This toolkit was not made to be fully explored in a single session. We made a digital interface to help you choose a **set of activities** that match your time availability, goals, and the stage of your project, as well as gather all the printable files you need.

! Tip: Time estimates for each activity are set for groups of 5. If you are a group of around 10 expect twice as much time, if you are around 15, expect around three times more, etc.

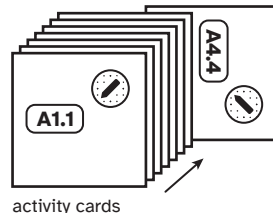

! Tip: Some activities have more than a single sheet.

② Cut and organise your cards by type

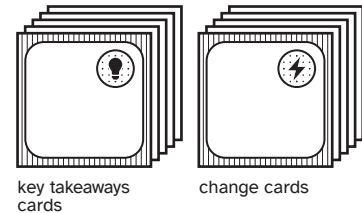

warm-up cards

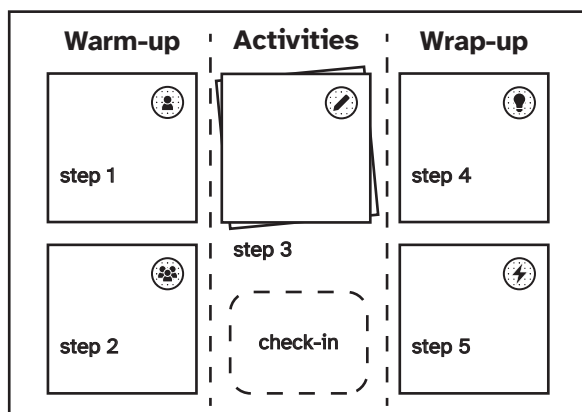

activity cards

wrap-up cards

③ Place your cards on the board and follow the steps

step 1: warm-up

Fill in your individual goal cards, write a team goal card, then record what changed from last session

step 2: activities

Draw the activity cards and fill in the corresponding worksheets in order

step 3: warm-up

Fill in your own key takeaway and change cards, then set a date for the next session

✓ You're all set!

A gentle reminder

This toolkit is yours to use in whatever way makes sense to you and your project. Please feel free to discard or alter any part of it. And remember, **there are no wrong answers!**

Activity Cheat-sheet:

	Activity	Purpose	Time est.
Attentiveness	1.1	Reflect on your background and motivation for the project	45min
	1.2	Assess the types of knowledge you have and/or need	15min
